

## High-performance network services designed for next-generation solutions

DXC Technology delivers market-leading networking solutions, complemented by AT&T solutions, across enterprise IT estates, with enhanced network performance, global coverage and scale, and the ability to move quickly to the campus and cloud.

### DXC and AT&T at a glance

- Market-ready offerings for global deployment at scale
- Joint foundation transforming the delivery of application, workplace and cloud-based services
- Next-generation delivery with improved network performance at a price that's competitive with commodity network providers
- An operating model that integrates people, process and tools management across the entire infrastructure

### About AT&T

AT&T empowers business transformation by connecting the new digital ecosystem with an integrated, on-demand network experience.

AT&T fuels business transformation through integrated solutions that tap into the power of everything that is connected. Connectivity is the core of everything businesses need to be successful today and in the future, and AT&T approaches connectivity differently. AT&T can deliver a set of collective capabilities that together establish a dynamic, highly secure, on-demand network platform.

### Customer benefits

For enterprises looking for network services that can optimize and protect their transformation projects, DXC delivers market-leading network solutions complemented by AT&T solutions to help customers quickly transform their businesses and modernize their network infrastructure, using DXC's Cloud Right™ strategy to address changing business needs.

Together, we provide the foundation for the effective delivery of DXC applications, workplace and cloud-based services. Comprehensive network management capabilities integrate multiple cloud providers through a single orchestration and management platform.

DXC's partnership with AT&T offers a business model and global scale for your transformation journey while maximizing the life span of your legacy infrastructure. Our combined portfolio helps you meet key business objectives, increase productivity, reduce complexity and drive down costs. DXC also provides application expertise to AT&T and its customers.

DXC modernizes and migrates applications to deliver the benefits of a cloud environment and provide access to a global, highly secure network service that supports the development of next-generation applications.

### Joint offerings/solutions

#### Network Connectivity

The network has evolved from connecting locations to connecting people and applications — it's increasingly about managing business workflows.

DXC customers benefit from our DXC and AT&T partner solutions covering:

- Scaled global networking assets that are highly secure and support ultra-high speeds, including VPN, ethernet, internet and network aggregation
- Comprehensive network-agnostic client edge solutions extending DXC SD-WAN with AT&T SD-WAN capabilities based on customer requirements and use case scenarios
- Holistically managed AT&T or third-party transport with on-demand control and near-real-time visibility

#### Campus and Endpoint

High-speed mobility and the explosive growth of IoT devices are changing how networks are deployed and managed, both within an enterprise location and beyond.

DXC customers benefit from our DXC and AT&T partner access and in-building solutions covering:

- 5G cellular covering licensed spectrum — owned/carrier-grade and unlicensed spectrum, IoT-Mobile Edge Compute (MEC) technology to connect

## 200+

countries and territories in which AT&T offers talk, text and data coverage

## 11+

year partnership

## 87M

IoT-connected devices

### About DXC Partner Ecosystem

The DXC Partner Ecosystem is a curated ecosystem of partner relationships built on a foundation of collaboration, differentiation and innovation. Together, we work to deliver the right solution and the right team to address complex, critical customer business challenges. Learn more at [dxc.com/partnerecosystem](https://dxc.com/partnerecosystem).

to a whole new class of immersive, low-latency applications for near-real-time data processing and analytics

- Home-working and small/midsize business software-defined networking solutions with boosted security

### Cloud and Data Center

Availability of interoperable clouds sitting centrally and on the edges is critical to delivering applications and services that propel digital transformation.

With clouds becoming more distributed, DXC customers can bring together their own data center, public cloud and private cloud environments in a true hybrid model by using our DXC and AT&T partner solutions covering:

- An ecosystem of colocation providers supported by highly secure connectivity options using AT&T NetBond and TAO
- Managed open-fabric software-defined data center solution including AT&T orchestration portal that virtualizes data center management

### Voice and Video

DXC customers benefit from our extended DXC and AT&T partner solutions covering:

- AT&T's voice and collaboration suite of services, which provide a "Voice on Teams" solution to improve communication, teaming and collaboration, turning the employee and customer experience into a

strategic advantage tailored for the omnichannel contact centers working with best-in-class providers to deliver modular solutions — onsite, in the cloud or hybrid designed to improve productivity and grow revenue

### Security

As business ecosystems become more digital and hyperconnected, security becomes more critical to decision making. DXC customers benefit from DXC and AT&T partner solutions:

- AT&T SASE framework capabilities integrate core technologies that provide higher-quality user experiences, maximize network capacity, improve network reliability deliver enhanced zero trust security. SASE solves the challenge of delivering consistent, secure access no matter where users, applications or devices live. Because it's a single service, AT&T Alien Labs helps customers protect their entire business and detect malicious activity in near real time.

### Differentiation

Organizations around the world, including large multinational companies, rely on our combined domain expertise and next-generation delivery models for infrastructure, integration and modernization. Together, DXC and AT&T provide a full range of solutions that deliver unique value to customers and enable better business outcomes.
