DXC Digital Transformation Centre

Solving complex problems with the speed of a start-up and the scale of an enterprise

Driving innovation with DXC Technology's Digital Transformation Centre

What is the Digital Transformation Centre?

The Digital Transformation Centre (DTC) is a rapid approach to solving complex problems and enabling innovation.

We work together with our customers and our network of partners to co-create digital products, services and processes designed to realise value, deliver cost benefits and improve business outcomes.

Our teams work virtually or in person – we're there where you need us.

Helping solve your complex business challenges and explore new opportunities

We help you explore new value streams or put transformational change into action to improve your business performance.

Realise new value streams

- Uncover new value streams within your organisation.
- Unlock new sources of value in the broader ecosystem your organisation operates in.
- Deliver cost benefits through new innovations.

Action transformational change

- Optimise existing processes within your organisation.
- Modernise mission-critical systems.
- Ensure company-wide adoption for better business outcomes.
- Deliver performance transparency.

The DTC approach

Our approach is data-driven and rich in practices, tools, frameworks and industry benchmarks. We also draw on our in-house technology expertise and our extensive partner ecosystem, including universities and start-ups, to apply original research, new thinking and diverse experiences in order to develop the right solution for you.

We deliver a roadmap to a solution vision, and when you're ready, we have the people, processes and tools to deliver a scalable technology solution at speed.

50+
frameworks

Joint creation

Joint execution

Industry benchmarks

Tailored to FSI, state and federal government, and more

20+
tools

80+
practices

Strategy and plan

Advice on strategies, research and design experiences that evoke delight, demonstrate simplicity and prove business value

Digital solutions

Engineer, test and integrate digital solutions to address key business challenges; use modular and Agile frameworks to stay focused on the needs of employees and customers

Business adoption and value realisation

Deploy, manage and modernise mission-critical systems, integrating them with new digital innovations and ensuring adoption for better business outcomes

What makes the DTC different

Holistic approach to business, technology and customer experience

We use a combination of best practices in business transformation, process transformation and service transformation in developing technology-enabled solutions.

Grounded in technology implementation

As a technology-driven consulting practice, we are grounded in technology implementation, backed by DXC's 60+ years of experience implementing complex, practical technology solutions on every tech platform.

Agility to deliver time to value

We power digital transformation with an agile mindset, to deliver maximum value with the shortest sustainable lead time.

Agnostic approach to development

DXC is technology- and partner-agnostic. We leverage your existing IT estate to deliver the optimal solution for your organisation.

Unique IP and rich methodology

Using our unique and rich IP, we tailor the right approach to help you fast-track your strategic initiatives.

Partnership with universities and tech partners

We collaborate with universities and our technology partner ecosystem to bring new research, fresh perspectives and diverse experiences.

Flexible ways of working – that work for you

Choosing the right engagement style allows you to achieve the time to value you need.
