Migrate confidently to the cloud in compliance with FedRAMP and CMMC

DXC Federal Cloud, powered by Dell Technologies

DXC Federal Cloud Migration Services provide the experience and expertise you need to quickly comply with the U.S. government's migration mandate.

Meet the demands of evolving regulatory mandates

The U.S. government's mandate requires aerospace and defense companies to host business workloads in hybrid cloud environments that meet several demanding requirements, including:

- Federal Risk and Authorization Management Program (FedRAMP)
- Federal Information Security Management Act (FISMA)
- Cybersecurity Maturity Model Certification (CMMC)

DXC Federal Cloud Migration Services from DXC Technology and Dell Technologies help you successfully transform and optimize your applications estate using agile approaches, tailored tools and proven best practices. Our services support a wide range of migration destinations, including government cloud (e.g., AWS GovCloud, Google Cloud Platform and Microsoft Azure Government) as well as commercial cloud, private cloud and multi/hybrid cloud.

Choose the right allies

When you partner with DXC and Dell Technologies to migrate your mission-critical workloads onto compliant environments, you will get:

- Accelerated **Authority to Operate (ATO)** certification
- Dramatically **reduced risk of downtime** during and after migration
- A robust, process-driven **modernization platform** that has more than 30 industrialized treatment tracks and delivers ongoing flexibility by being cloud agnostic
- **Cost savings** of 70% – 80% resulting from the use of our market-tested processes and patented tools for transformation
- **End-to-end support** ranging from the initial discovery and cataloging of applications to be migrated through ongoing system management
- Access to migration resources with a range of **security clearances**, such as Secret, Top Secret, Sensitive Compartmented Information (TS/SCI)

The DXC Technology and Dell Technologies partnership brings proven expertise and experience to your Federal Cloud, FedRAMP and CMMC migration projects.

Key benefits

- Minimized risk of downtime, disruption and delay
- Fast, safe migrations
- Platform vendor independence
- Market-proven migration tools and processes
- Access to resources with security clearances

About Dell Technologies

Dell Technologies (NYSE: DELL) is a unique family of businesses that helps organizations and individuals build their digital future and transform how they work, live, and play. The company provides customers with the industry's broadest and most innovative technology and services portfolio spanning from edge to core to cloud.

Key features

DXC and Dell Technologies transform applications using cloud-native services that securely accelerate time to value. Our engagement model speeds implementation using "migration squads" that are ready to execute in rapid sprints and simplified communications via clear points of contact.

Essential elements of our Federal Cloud Migration Services include:

- **Federal expertise.** Specialized in effective FedRAMP workload strategies, compliance design consulting and implementation, and ATO consulting.

- **Secure delivery model.** We maintain highly secured resources with International Traffic in Arms Regulations (ITAR), Secret, Top Secret and Top Secret-Poly credentials. We leverage cloud-certified, U.S.-based resources capable of developing, deploying and managing mission-critical workloads.

- **Application discovery and dependency.** Automated processes for discovering, analyzing and documenting applications and their interdependencies.

- **Application profiling.** Efficient assessment of each application's business and technical factors for organization into modernize, migrate, retain or retire categories.

- **Application migration and modernization.** Plan, schedule, migrate and modernize applications to the cloud using industry-leading tools and processes, including DXC Data Migration Studio and a wide range of Java, Linux and Microsoft modernization tools.

- **Tech refresh.** Combine cloud adoption with legacy technical debt remediation programs to establish modernized, hybrid IT estate databases and applications. Migrate complex heterogeneous databases and applications (such as SharePoint, Lotus Notes and Access forms) to the cloud.

Why DXC/Dell Technologies?

As experienced global leaders with a 25+ year partnership, DXC and Dell Technologies bring market-leading servers, storage, application services and systems integration capabilities to deliver modernization solutions from the edge to core to cloud.

We consistently deliver:

- Joint cloud and platform modernization solutions that are easy to manage, are agile and provide a low total cost of ownership

- Seasoned migration, IT and cloud professionals who take a consulting-first approach to cloud engagements, and work side by side with you to identify and understand your business opportunities, challenges and use cases

- A customized roadmap that emphasizes speed to market and long-term flexibility

- Cloud-based migration services that provide you with a variety of choices to meet your specific applications needs

- Flexibility to seamlessly leverage a mix of government cloud, private cloud and hybrid cloud resources in addition to the public cloud
